

STRIP FRESHENER CAB CONTROL

Make adjustments with cab control for changing field conditions with the 2984 Strip Freshener CC.

- » Create new strips in the fall or freshen existing strips in the spring
- » Operate at 6 to 10 mph and at 1 1/2" to 4" deep, depending on depth setting
- » Adjustable depth control
- » Fine-tune row cleaner and rolling basket air pressure from the cab

THE ORIGINAL 2984 STRIP FRESHENER

Strip-till in the fall
or the spring.

The 2984 Strip Freshener is specifically designed to address the issues strip-tillers face, including field conditions, weather, and time.

The three-blade design with rolling basket creates 10" wide strips in the spring or fall. The strips are warmer and drier, leading to a more consistent seedbed to plant into.

CONTROLLED TILLAGE FOR THE IDEAL SEEDBED

- » Use it ahead of the planter to facilitate consistent soil warming and bring existing strips to life
- » Creates strips in untilled soil
- » Places liquid or dry fertilizer in the strips
- » Operates at 6 to 10 mph and 1 1/2" to 4" deep, depending on depth setting
- » Features three-blade arrangement with rolling basket to condition strips for an ideal planting zone
- » Features parallel linkage with three easy adjustments to follow changing field conditions
- » Universal mounting bracket to fit 4" x 4", 5" x 7", 6" x 6", and 7" x 7" toolbars
- » Add a floating row cleaner to clean rows while making strips
