

## New Product Information

### Popular Floating Residue Manager From Yetter Now Available With Screw Adjust™ for Narrow and Wide Rows

***View the new 2967 Screw Adjust Floating Residue Manager on the Yetter Web site.***

The 2967 Screw Adjust Floating Residue Manager from Yetter Farm Equipment combines the power of the Short Version Titan™ with timesaving Screw Adjust™ technology.

This innovative member of the Titan residue management family is now available in two series. The 2967-004 models accommodate 22-, 30-, 36-, and 40-inch rows. Growers planting narrow rows can look to the 2967-001 series for 15- and 20-inch rows.

“The 2967 Screw Adjust Floating Residue Manager models are short and compact. They are the perfect choice for planters with limited space to mount attachments,” said Yetter Research and Development Specialist Don Bunnell.

With the Yetter-exclusive Screw Adjust feature, growers spend more time working in the fields and less time adjusting. The self-detent adjustment handle allows for quick adjustment to adapt to changing field conditions. The handle is located in the center of the unit, an easy-to-access location that allows adjustment from the front, side, or top of the row unit.

According to Bunnell, “This unit is incredibly efficient in the field. As with all our Screw Adjust models, making depth adjustments is not cumbersome. With little effort, the working depth can be adjusted to remove varying amounts of residue and work in varying soil conditions.”

As a member of the Titan family, the residue manager can be set to float, moving the desired amount of residue and following the contours of the ground. Producers can also lock the residue manager in place with a spring-loaded pin, an option that gives the 2967-004 or -001 the flexibility to match power to field conditions.

The Screw Adjust Floating Residue Manager can be utilized with SharkTooth® or finger-wheel configurations. Add Yetter Floater Wheels to increase surface area and further increase depth control.

## Profitable Solutions for Production Agriculture

Established in 1930 and based in Colchester, Illinois, Yetter Manufacturing Company is the industry leader in planter attachments that boost productivity and profitability. Yetter makes a variety of coulters, residue managers, precision fertilizer placement products, markers, and bulk seed handling devices.
