Yetter Adds New Features to 2966 Residue Manager

View the new 2966 for 60/90 series John Deere openers on the Yetter Web site.

Since Yetter Farm Equipment introduced its 2966 Residue Manager in 2008, growers have experienced the benefits of integrated residue management on their John Deere 60 and 90 series openers.

“This effective and versatile residue management tool helps producers overcome hurdles faced during seeding, such as hairpinning of residue, inconsistent seed depth and placement, and lack of seed-to-soil contact,” said Andy Thompson, Yetter AOR manager.

For 2011, a downstop setting has been added to the 2966 in order to give producers more adjustment capability. This feature means the downward travel of the residue manager can be limited, which in turn limits the amount of residue moved from in front of the seed furrow.

The unit also features the Yetter-exclusive SharkTooth® residue management wheel that has specially designed, backwards-sloping teeth to clear the residue from in front of the opener blade and seeding boot. The floating design of the 2966 allows the residue manager to follow changing soil terrain.

“Moving the right amount of residue cover on the field is important for producers using no-till and min-till systems, and so is creating the ideal seed zone for planting. The Yetter 2966 does both,” said Thompson.

Users of the 2966 Residue Manager for 60/90 series John Deere openers typically experience improved seed placement, reduced hairpinning of residue, improved germination from seed to plant, and the ability to reduce seeding populations.

Other improvements made for spring 2011 include more road clearance for the residue manager.

The 2966 residue manager mounts directly to the 60 or 90 series opener’s main arm. It is available in left- or right-handed models to match the seed opener as the 2966-002-L-STFW or 2966-002-R-STFW. The unit comes standard with the SharkTooth wheel as well as a floater wheel.

Profitable Solutions for Production Agriculture

Established in 1930 and based in Colchester, Illinois, Yetter Manufacturing Company is the industry leader in planter attachments that boost productivity and profitability. Yetter makes a variety of coulters, residue managers, precision fertilizer placement products, markers, and bulk seed handling devices.
