Yetter Bulks Up Knife on Trusted Fertilizer Application Tool

Viper II® knife's front edge now strengthened with tungsten carbide

View the Spring-Loaded Side Knife on the Yetter Web site. (Liquid knife shown above.)

tungsten carbide, it features an adjustable gauge wheel. The ground-engaged knife runs at an operating depth of 1 to 3½ inches.

Long-trusted to provide growers with solutions, Yetter Farm Equipment has responded to customers' calls for a knife that can cover more acres before replacement on precision-fertilizer placement favorite, the Viper II®.

The 3000-200/201 Spring-Loaded Dry Side Knife and 3000-206/207 Spring-Loaded Liquid Side Knife were improved by adding tungsten carbide, a metal originally developed for use as a cutting tool in machine applications that is now used in various applications throughout the world to increase durability.

"We worked closely with our supplier to integrate tungsten carbide into the edge of the Spring-Loaded Side Knife where the knife contacts the coulter blade," said Yetter Product Specialist James Whitcomb. "Adding the carbide eliminates the front knife wear and increases the life of the knife. The carbide is welded into the knife, securing the carbide to the fertilizer knife."

Growers using the Viper II With Gauge Wheel for placement of liquid or dry fertilizer will find this knife option significantly improves product performance and the life of knife.

The 3000 Viper II is the right choice for precise placement of liquid or dry fertilizer. In addition to the spring loaded fertilizer knife, now with

Profitable Solutions for Production Agriculture

Established in 1930 and based in Colchester, Illinois, Yetter Manufacturing Company is the industry leader in planter attachments that boost productivity and profitability. Yetter makes a variety of coulters, residue managers, precision fertilizer placement products, markers, and bulk seed handling devices.
