Take Bulk Seed Handling to the Max With Yetter

View the new Maximizer™ on the Yetter Web site.

Yetter Farm Equipment, a leader in bulk seed handling solutions, introduces a redesigned version of its popular conveyor for bulk seed setups.

"The 1310 Maximizer™ Bulk Seed Conveyor is the perfect solution to keep big planters rolling," said Yetter Marketing Manager Derek Allensworth.

The conveyor's onboard capacity for up to four seed boxes provides ample seed supply, speeding up the planting process. Seed gently moves along the conveyor belt, filling planters quickly.

"Making the most of every minute is important during planting," said Allensworth. "The Maximizer requires only one person to operate, reducing the spring labor crunch."

The new conveyor always puts producers in perfect position for filling. The conveyor rotates 180 degrees to fill the planter or seeder from the side or rear. When being relocated, the conveyor can be locked in a forward or rearward transport position.

The Maximizer conveyor can be raised and lowered for use with central-fill systems, but is also compatible with individual row-unit boxes. And, it is offered with an optional telescoping downspout.

The 1310 Maximizer Bulk Seed Conveyor features:

- A 5.5 horsepower Honda engine with variable speed control.
- All-welded, steel construction framework.
- An easy-to-clean conveyor to eliminate seed contamination.
- A 180-degree pivot range.

"The Maximizer is another product within Yetter Farm Equipment's complete lineup of bulk seed handling tools," said Allensworth. "Yetter offers the 1300 Seed Jet II system, the 1300 Seed Box Train, and now the new Maximizer. These bulk seed-handling equipment choices are time-saving and labor-saving investments."

Profitable Solutions for Production Agriculture

Established in 1930 and based in Colchester, Illinois, Yetter Manufacturing Company is the industry leader in planter attachments that boost productivity and profitability. Yetter makes a variety of coulters, residue managers, precision fertilizer placement products, markers, and bulk seed handling devices.
