

## New Product Information

### New Titan™ Models from Yetter Fit 15-, 20- and 22-Inch Rows

The two newest Titan™ models from Yetter Manufacturing are residue managers that producers with narrow rows can count on to perform. The new models give growers with 15-, 20-, and 22-inch row planters a floating residue manager option that many producers with 30-inch rows have utilized.

“The 2967-013 and -014 residue managers combine all the characteristics of Yetter Manufacturing’s most popular Short Titans with the residue clearing capabilities of the narrow-row residue managers, which have always been successful on 15-, 20-, 22-inch rows,” said Andy Thompson, a Yetter territory manager.

The 2967-013 and -014 residue managers power through even the toughest residue without causing undesirable soil disturbance. High-strength steel arms can be set to float and follow the soil contour. Or, they can be locked down to hold the wheels firmly in place.

Producers will find further flexibility in wheel settings as well—wheels can operate with one wheel leading or with both wheels parallel.

The adjustment system on the new models makes depth control easy. An easily accessible handle located in the center of the unit enables adjustment without additional tools, saving producers time and therefore money.

As with all Yetter residue managers, these units can utilize the standard wheels, SharkTooth® wheels, or heavy-duty wheels, in addition to floater wheels. Models are available to fit Case IH planters or John Deere, Kinze, and White planters.

## Profitable Solutions for Production Agriculture

Established in 1930 and based in Colchester, Illinois, Yetter Manufacturing Company is the industry leader in planter attachments that boost productivity and profitability. Yetter makes a variety of coulters, residue managers, precision fertilizer placement products, markers, and bulk seed handling devices.
