Yetter Manufacturing Combines Three Innovations Into One Residue Manager

<http://media.yetterco.com/049fltscradj.jpg>

Yetter has merged the power of the Short Version Titan™ and timesaving QuickAdjust™ technology to create the new Screw Adjust Floating Residue Manager. This latest, innovative addition to the Titan residue management family is built to last and easy to use.

According to Yetter Customer Service Representative Jim Lascelles, "This unit is incredibly efficient in the field. Because making adjustments is not cumbersome with the 2967-049 Screw Adjust Floating Residue Manager, time spent on depth adjustments is dramatically reduced."

From front-to-back, the 2967-049 residue manager is short and compact. It is perfect for planters with limited space to mount attachments. The residue manager can be set to float, moving residue and following the contours of the ground.

Producers can also lock the residue manager in place, an option that gives the 2967-049 more flexibility to work in a variety of soil conditions.

Spend more time working in the fields and less time adjusting with the added screw adjust feature. The exclusive self-detent adjustment handle allows for quick, one-handed adjustment. This unique feature provides constant, accurate depth control.

With little effort, the working depth can be adjusted to remove varying amounts of residue and work in varying soil conditions. In addition, a depth indicator ensures a uniform depth setting for each row across the planter.

"The QuickAdjust raises or lowers the operating height of the residue manager to move the desired amount of residue while planting," said Lascelles. The adjustment handle is located in the center of the unit, an easy-to-access location that makes the adjustment process smooth and facilitates better use of valuable planting time.

The Screw Adjust Floating Residue Manager can be utilized with SharkTooth® or finger-wheel configurations.

Profitable Solutions for Production Agriculture

Established in 1930 and based in Colchester, Illinois, Yetter Manufacturing Company is the industry leader in planter attachments that boost productivity and
