## Hubcap Retainer Offered on All Yetter Manufacturing Coulters

<http://media.yetterco.com/hubcapstrap.jpg>

Producers who invest in top-quality coulters and residue managers from Yetter Manufacturing not only get supreme performance; they also get a little extra security.

The 2987-301 hubcap retainer strap is now standard on all Yetter coulters. "In heavy residue situations such as continuous corn or when side dressing, tough, standing residue can damage the hubcap or catch it and cause it to become lost," explained Derek Allensworth, Yetter marketing manager. "With the bolt-on strap, the hubcap will not be dislodged.

The strap is engineered to precisely conform to and wrap snugly around the hubcap. It securely bolts in place. Removal is simple as well, making regular service on the hub easy.

"A secure hubcap eliminates the possibility for contamination on the interior portion of the hub," said Allensworth.

Another benefit is that producers will spend less time and money on maintenance issues that could have been avoided. The 2987-301 hubcap retainer strap prevents downtime during the most critical-use season.

## Profitable Solutions for Production Agriculture

Established in 1930 and based in Colchester, Illinois, Yetter Manufacturing Company is the industry leader in planter attachments that boost productivity and profitability. Yetter makes a variety of coulters, residue managers, precision fertilizer placement products, markers, and bulk seed handling devices.
