## Titan Power from Yetter Now Available to Producers Operating Case IH Planters

With the introduction of a new 2967-097 Short Version Titan™, Yetter Manufacturing Company brings the power of the Titan family of residue managers to producers with Case IH planters.

“Case IH planter users now have the option of a short and compact, floating residue manager,” said Andy Thompson, a Yetter territory manager. With a maximum width of only 12¾ inches, the Short Titan is perfect for setups with limited space.

The simple, rugged design mounts easily to the row unit of Case IH planters. Yetter engineers created the 2967-097 Short Titan to work especially well with the new Case IH downforce kit, ensuring optimal performance from all planting equipment.

The Short Titan for Case IH planters offers the superb residue-management capability of original Titan. A standard feature of the Titan is its ability to be adjusted to handle a range of soil conditions. It can be locked in a rigid position for wheel traction to power through tough residue, or it can be set to float and follow the contours of the ground.

The time-saving QuikAdjust™ system of the 2967-097 Short Titan for CNH planters makes depth control easy. An easily accessible handle located in the center of the unit enables adjustment without additional tools, saving producers time and headaches.

“As with all Titan residue managers, the 2967-097 Short Titan can be utilized with all Yetter Manufacturing wheel configurations,” said Thompson. Couple the Short Titan with a floater wheel to assist in depth control. Or, for unparalleled residue management, add a 13-inch SharkTooth® wheel—Yetter Manufacturing’s exclusive residue management tool with unique backward-sloping, sharpened teeth that handle the toughest residue conditions.

## Profitable Solutions for Production Agriculture

Established in 1930 and based in Colchester, Illinois, Yetter Manufacturing Company is the industry leader in planter attachments that boost productivity and profitability. Yetter makes a variety of coulters, residue managers, precision fertilizer placement products, markers, and bulk seed handling devices.
