## Yetter Manufacturing Tailors Residue Manager to Fit Great Plains Row-Unit

<http://media.yetterco.com/2967GP.jpg>

Yetter Manufacturing is committed to delivering residue management solutions that work with the wide range of planting equipment on the market today. The company has added another a residue manager to its impressive lineup. This time, the tool is designed to fit Great Plains Yield-Pro® planters with 25 series row-units.

The new 2967 Narrow Row Residue Manager from Yetter for Yield-Pro planters is a floating, single-wheel residue manager featuring screw-adjust capabilities.

“This product has right and left hand models, works great in any residue type, and is designed to adjust quickly and easily for the customer,” commented Derek Allensworth, Yetter Manufacturing’s marketing manager.

Partially because the 2967 Narrow Row Residue Manager is single-wheel, it is ideal for a narrow-row planter like the Yield-Pro 15-inch, twin-row planter. Attach any Yetter residue management wheel option to the 2967 Narrow Row Residue Manager, and it will work hard, powering through all residue types. It impressively clears residue without throwing debris into adjacent rows, and will not interfere with most other frame-mounted tillage tools.

The new 2967 Narrow Row Residue Manager offers the same benefits as other Yetter residue management tools—faster soil warm-up, no residue hairpinning, and reduced planter row-unit bounce—as well as the precise depth control of the original Yetter Screw Adjust Residue Manager.

This built-to-last residue manager is designed to set a bottom working depth that enables it to float with the soil surface, moving residue and following the ground terrain. The easy-to-assemble, floater-wheel attachment maintains right depth in all conditions.

Designed to last a lifetime, the 2967 Narrow Row Residue Manager is mounted on a heavy-duty, cast-iron hub that features a greasable, double-row ball bearing for extended service life. The residue manager has a high-strength, tubular-mounting, steel arm, as well as heavy-duty pivots on the mounting bracket.

## Profitable Solutions for Production Agriculture

Established in 1930 and based in Colchester, Illinois, Yetter Manufacturing Company is the industry leader in planter attachments that boost productivity and profitability. Yetter makes a variety of coulters, residue managers, precision
