

New Product Information

New Yetter Manufacturing Fertilizer Opener a Perfect Fit

Yetter Manufacturing has added one of the most flexible fertilizer openers on the market today to its extensive lineup of fertilizer application tools. The new, 2968 Row Unit Mount In Between Fertilizer Opener solves the placement problem for producers who need to achieve off-the-row placement of starter or nitrogen fertilizer.

The 2968 attachment is uniquely designed to be installed behind the gauge wheel. "The purpose of this location is to fit different models of planters in the same manner while eliminating the possibility of fertilizer build-up on the row unit gauge wheels," explained Yetter Marketing Manager Derek Allensworth.

The 2968 Row Unit Mount In Between Fertilizer Opener from Yetter achieves consistent fertilizer placement at all times because it is mounted to the row unit, in direct correlation to seed placement. Producers can set the units to apply fertilizer from 1½ to 2 inches off the seed row. The depth is adjustable in ¼-inch increments—up to one inch below the seed.

The 2968 fertilizer opener utilizes a 10-inch disc for easier penetration. The attachment also helps break up side-wall compaction so the press wheel can more effectively close the seed trench.

"The 2968 fertilizer opener is designed to mount on either side of the seed trench just behind the gauge wheels, allowing the use of face-plate mounted, row unit attachments like residue managers," added Allensworth.

Mounting this tool requires no drilling of holes for producers with newer-style John Deere and Kinze planters.

The compact design of the Row Unit Mount In Between Fertilizer Opener means it is easy to add to a variety of mounted and pull-type planter setups. "Larger fertilizer units often cause growers frustration because finding room to mount them in front of or behind their planter unit is difficult. Mounting the 2968 fertilizer opener is a much easier task!"

Profitable Solutions for Production Agriculture

Established in 1930 and based in Colchester, Illinois, Yetter Manufacturing Company is the industry leader in planter attachments that boost productivity and profitability. Yetter makes a variety of coulters, residue managers, precision fertilizer placement products, markers, and bulk seed handling devices.
