FARM EQUIPMENT

PATENTED

TWISTER™

CLOSING WHEELS

With weather and field conditions changing every year, 6200 Twister Closing Wheels are a key component for even emergence.

In 4 of 4 studies conducted in central Illinois, Indiana, Ohio, and southern Illinois, Yetter 6200 Twister Closing Wheels showed the highest yield response in comparison to other closing wheel brands—adding an **AVERAGE OF 7.75 BU/ACRE.**

BETTER CLOSING WHEEL PERFORMANCE

The twisted-spike design of the 6200 Twister Closing Wheel is key to breaking down the sidewall compaction caused by the planter opener discs. The spikes close and firm soil over the seed to eliminate air pockets, enhancing seed-to-soil contact for earlier germination and even emergence.

6200 TWISTER CLOSING WHEEL FEATURES

- » Wheel utilizes twisted poly spikes and a rounded center
- » Ring design maintains wheel depth and also firms the soil
- » Closes the disc opening in both wet and ideal conditions
- » Is available with full wheel assembly or as ring-only option for installation on factory wheels

BECK'S

YETTER CLOSING WHEEL SOLUTIONS

6200 AIR-SEEDER-COMPATIBLE SPIKE CLOSING WHEEL

- » Improves closing of seed furrow in seeding conditions
- » Enhances seed-to-soil contact
- » Eliminates potential sidewall compaction
- » Helps warm soil over seed and improve emergence
- » 13" wheel

6200 CAST SPIKE CLOSING WHEEL

- » Wide-crowned depth band controls spike depth/prevents seed disturbance
- » Teeth designed to lift, fracture, and warm soil to enhance seed-to-soil contact and speed emergence
- » Eliminates sidewall compaction
- » Standard wheel is 15" in diameter
- » Is available with optional scraper

6000 CASE IH CLOSING DISC

- » Eliminates sidewall compaction to encourage root development
- » Creates loosened soil with churning action, improving seed-to-soil contact and germination

6200 PADDLE CLOSING WHEEL™

- » Creates uniform seed trench across entire seed zone
- » Ensures full seed-to-soil contact, preventing yield-robbing air pockets
- » Fractures sidewall as paddles enter and exit soil
- » Helps warm soil to speed emergence

6200 FIRMING WHEEL

- » Gently firms the seedbed and helps prevent air pockets
- » Has adjustable spring pressure
- » Complements Spike Closing Wheels

Profitable closing wheel options

6200-108 DRAG CHAIN

- » 5/8" twisted Drag Chain helps closing wheels in varying conditions during planting

6200 DRAG CHAIN SHIELD

- » Prevents Drag Chains from flipping up on closing wheels
- » Chain can easily be raised when not in use
