

2940 AIR ADJUST™ SERIES

Take control from the cab.

Planting conditions change every hour, every day. That's no problem with the Air Adjust Series from Yetter Farm Equipment. Equipped with pneumatic controls, this industry-leading lineup allows you to make quick adjustments right from the cab.

IN-CAB CONTROLLER

On-the-go technology

- » Make adjustments quickly and accurately during planting
- » Height and down pressure settings can be adjusted independently
- » Five presets can be programmed for quick changes
- » Units can be raised from the cab as needed with the push of a button for wet areas, waterways, end rows, etc.
- » Utilizes an in-cab screen or integrates with existing ISOBUS monitor to control functions of 2940 products; both options support Wi-Fi connection

Wi-Fi controls for tablet or iPad

John Deere ISOBUS option

ROW CLEANER

The residue-managing solutions Yetter is known for with convenient on-the-go adjustment

- » Features parallel linkage so row cleaner follows ground contour better than single-pivot designs
- » Available in wide (22"–40") and narrow (15"–22") widths
- » Adjust up and down pressures to create the ideal ride for row cleaners

PNEUMATIC HYDRAULIC CONTROLLER KIT

PATENTED

HYDRAULIC PNEUMATIC COMPRESSOR KIT

PERFECT FOR YOUR ON-THE-GO OPERATION

Stopping to adjust to changing field conditions means you cover fewer acres per day. The Air Adjust Series eliminates that waste and helps you cover more ground in less time.

COULTER/ROW CLEANER COMBO

Unit-mounted coulters with air-adjustable floating row cleaner

- » Coulters can be removed and row cleaner can still be used
- » Adjust up and down pressures to create the ideal ride for row cleaners

Wi-Fi controls for tablet or iPad

John Deere ISOBUS option
