

FLOATING ROW CLEANERS

Profitable residue management solutions for all tillage systems and field conditions.

Yetter Farm Equipment's simple and rugged floating row cleaners follow the soil contour and offer a range of adjustment settings. Adding the optional Air Assist Cylinder gives you the ability to easily adjust up and down pressure from your tractor seat as field conditions change so your row cleaners consistently clear residue, improving row unit performance and leading to better crop emergence.

**2967-013/014* SHORT, NARROW
FLOATING ROW CLEANER**

*If you are fitting a John Deere, Kinze, or White planter, choose the 2967-013. Fitting a Case IH planter? You need the 2967-014 model.
