

NEW! 9000 REBEL STRIP-TILL

One row unit to customize without compromise.

An effective strip-till system gives growers the flexibility to create new strips in the fall or spring and freshen and maintain existing strips in either season.

Meet the Rebel, one of the industry's most versatile and adaptable strip-till row units. The Rebel is designed to interchangeably operate with either a coulters attachment or a knife configuration. Its quick-change design makes it easy to transition between the two, giving you maximum flexibility across varying management practices.

9000 REBEL

- » Quickly change between knife and coulters attachments
 - » Knife: 5" to 8" depth
 - » Coulters: 1 1/2" to 4" depth at 6 to 10 mph
- » Strip coulters attachment allows quick conversion to operate as strip freshener unit
- » Easy, independent manual coulters and knife adjustment for creating perfect strip
- » Make pneumatic in-cab adjustments to row unit down pressure, berm builders, row cleaners, and rolling baskets
- » Hydraulic auto-reset for knife to automatically disengage over obstacles
- » Supports dry, liquid, anhydrous, or combination fertilizer applications
