

NEW! STRIP FRESHENER CAB CONTROL

Make adjustments with cab control for changing field conditions with the 2984 Strip Freshener CC.

- Create new strips in the fall or freshen existing strips in the spring
- Operate at 6 to 10 mph and at 1½" to 4" deep, depending on depth setting
- Quickly and easily adjust depth control
- Fine-tune row cleaner and rolling basket air pressure from the cab

ADJUSTABLE AIR PRESSURE

ADJUST DEPTH IN 1/4" INCREMENTS

PARALLEL LINKAGE FOR INDIVIDUAL ROW-BY-ROW PERFORMANCE

ADJUSTABLE AIR PRESSURE ON ROLLING BASKET

ROLLING BASKET CONDITIONS STRIP FOR CONSISTENT SEEDBED

ADJUSTABLE AIR PRESSURE FOR FLOATING ROW CLEANER

OPTIONAL LIQUID OR DRY FERTILIZER PLACEMENT

3 BLADES MIX SOIL FOR IDEAL SEEDBED

SPOKE GAUGE WHEELS CONTROL DEPTH

THE ORIGINAL 2984 STRIP FRESHENER

Revive and create strips in the spring

The 2984 Strip Freshener is specifically designed to address the unique challenges strip-tillers face in the spring, when it's crucial to make the most of each minute spent in the field.

The Strip Freshener's 3-blade design mixes the upper soil profile 1½" to 4" inches deep—ideal for warming and drying strips made in the fall so the seedbed is ready for earlier planting. It is a field-proven, no-till alternative that can create spring strips.

CONTROLLED TILLAGE FOR THE IDEAL SEEDBED

- Use it ahead of the planter to facilitate consistent soil warming and bring existing strips to life
- Creates strips in untilled soil
- Optional liquid or dry fertilizer placement in strips
- Operates at 6 to 10 mph and 1½" to 4" deep, depending on depth setting
- Features 3-blade arrangement with rolling basket to condition strips for an ideal planting zone
- Utilizes parallel linkage with 3 easy adjustments to follow changing field conditions
- Universal mounting bracket fits 4" x 4", 5" x 7", 6" x 6", and 7" x 7" toolbars
- Add a floating row cleaner to clean rows while building strips
