

# 4000 SERIES NUTRIENT-PRO FERTILIZER COULTER

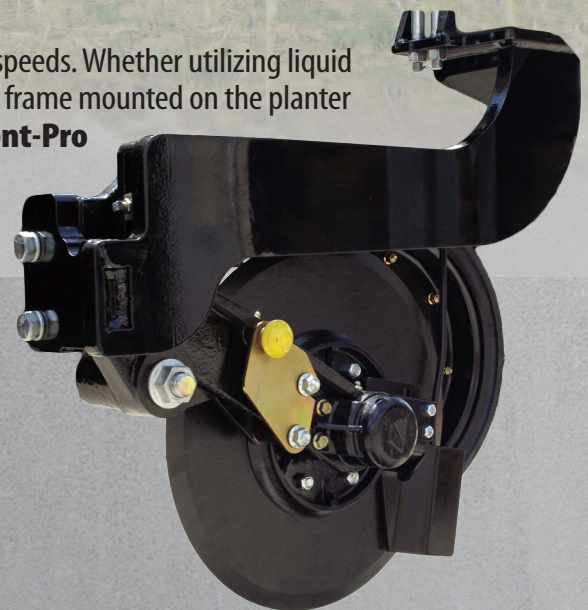

## INNOVATION IN FERTILIZER COULTERS

Today's growers require precisely placed nutrients in the soil at higher ground speeds. Whether utilizing liquid or dry fertilizers, the versatility of the single-disc coulters enables the unit to be frame mounted on the planter or directly mounted to the toolbar for side-dressing. The **4000 Series Nutrient-Pro Coulter**, by Aulari, has been field proven for six years in tough and diverse field conditions in North America, Eastern Europe, and South Africa.

## PRECISION PLACEMENT FERTILIZER COULTER

- 5 easy-to-adjust depth settings from 1.5"-6"
- 3 quick adjust down pressure settings from 400, to 520, to 640 pounds
- 2 disc options: 18" or 20" diameter
- 7 degree disc angle to maintain ground contact at higher speeds
- Accurately applies fertilizer at speeds up to 12 mph
- 3" x 16" depth control wheel to follow soil contours
- Adapted to all tillage systems from conventional to no-till conditions
- Rugged heat-treated, cast-steel construction
- Easy disc replacement
- Optional closing disc to close the slot

*The solution for  
your precision  
placement  
fertilizer needs.*

### MOUNT BRACKET KITS FOR WIDE RANGE OF PLANTERS

- John Deere: 1720/25, 1750/55, 1760/65NT 8-Row
- CaseIH: 1225, 1235, 1240/45 12 & 16-Row, 1250/55 12, 16, & 24-Row
- White: 8100 6, 8, & 12-Row, 8816, 8824, 9812, 9816, 9824
- Kinze: 3000 4, 6, & 8-Row, 3600 8, 12, & 16-Row
- Toolbar Mounts for: 3x3, 4x4, 2x6, 3x6, 5x7, 7x7

Contact Yetter Manufacturing for other planter models.

*All planters will require an extra toolbar  
All kits are equipped with 3" x 13" Depth Wheel*

# Fertilizers maximize yield potential

Optimize yield potential and production efficiency with precision placement of NPK plus sulfur and micronutrients by banding near the seed. Considerations for fertilizer type, soil fertility, application rates, and field conditions require versatility in coulters design. The **4000 Series Nutrient-Pro Coulters** meet the challenge.

## **NEXT GENERATION FERTILIZER OPENER**

Eliminate guess work and be assured that your placement of fertilizer is in the zone you prescribed with the new generation in fertilizer application: Yetter Farm Equipment's **4000 Series Nutrient-Pro Coulters**.

**3" x 16" Depth Control Wheel**

**Down pressure settings (top to bottom):**

- 640 pounds
- 520 pounds
- 400 pounds

**Bolted, steel dust cap for better protection against crop residue and stones**

**5 depth settings:**  
1.5" to 5" for 18" disc  
2.5" to 6" for 20" disc

**Same liquid or dry knife fits on either 18" or 20" diameter disc. Stainless steel tube ensures dependable service.**

## **OPTIONAL DISC SEALER**

Eliminate the potential for open trench with the optional disc sealer that closes the slot to keep nutrients where they were placed. For side-dressing applications this does the job.
