

# 2940 AIR ADJUST™ SERIES

## Take control from the cab

Planting conditions change every hour, every day. That's no problem with the Air Adjust Series from Yetter Farm Equipment. Equipped with pneumatic controls, this industry-leading lineup allows you to make quick adjustments right from the cab.

### IN-CAB CONTROLLER

#### On-the-go technology

- » Make adjustments quickly and accurately during planting
- » Height and down pressure settings can be adjusted independently
- » Presets can be programmed for quick changes
- » Units can be raised from cab as needed with the push of a button for wet areas, waterways, end rows, etc.
- » Utilizes an in-cab screen or integrates with existing ISOBUS monitor to control functions of 2940 products; both options support Wi-Fi connection

Wi-Fi controls for tablet or iPad

### ROW CLEANER

The residue-managing solutions Yetter is known for with convenient on-the-go adjustment

- » Features parallel linkage so row cleaner follows ground contour
- » Available in wide and narrow widths
- » Adjusts up and down pressures to create the ideal ride for row cleaners
- » Down pressure can be increased to fix row cleaner in rigid position

HYDRAULIC PNEUMATIC COMPRESSOR KIT

# PERFECT FOR YOUR ON-THE-GO OPERATION

Stopping to adjust to changing field conditions means you cover fewer acres per day. The Air Adjust Series eliminates that waste and helps you cover more ground in less time.

## FIRMING WHEEL

**A solution for challenging soil**

- » Complements closing wheels by gently firming the seed zone
- » Creates a uniform growing environment and helps eliminate air pockets

## COULTER/ROW CLEANER COMBO

**Unit-mounted coulters with air-adjustable floating row cleaner**

- » Coulters can be removed and row cleaner can still be used
- » Adjust up and down pressures to create the ideal ride for row cleaners
