#### **FOREWORD**

You've just joined an exclusive but rapidly growing club.

For our part, we want to welcome you to the group and thank you for buying a Yetter product.

We hope your new Yetter products will help you achieve both goals-increase your productivity and increase your efficiency so that you may generate more profit.

This operator's manual has been designed into four major sections: Foreword, Safety Precautions, Installation Instructions and Parts Breakdown.

This SAFETY ALERT SYMBOL indicates important safety messages in the manual. When you see this symbol, be alert to the possibility of PERSONAL INJURY and carefully read the message that follows.

The word **NOTE** is used to convey information that is out of context with the manual text. It contains special information such as specifications, techniques and reference information of a supplementary nature.

The word **IMPORTANT** is used in the text when immediate damage will occur to the machine due

to improper technique or operation. Important will apply to the same information as specified by note only of an immediate and urgent nature.

It is the responsibility of the user to read the operator's manual and comply with the safe and correct operating procedure and to lubricate and maintain the product according to the maintenance schedule in the operator's manual.

The user is responsible for inspecting his machine and for having parts repaired or replaced when continued use of the product would cause damage or excessive wear to the other parts.

It is the user's responsibility to deliver his machine to the Yetter dealer who sold him the product for service or replacement of defective parts, which are covered by the warranty policy.

If you are unable to understand or follow the instructions provided in this publication, consult your local Yetter dealer or contact:

#### YETTER MANUFACTURING CO.

309/776-4111 800/447-5777 309/776-3222 (FAX)

#### **WARRANTY**

Yetter Manufacturing warrants all products manufactured and sold by it against defects in material. This warranty being expressly limited to replacement at the factory of such parts or products as shall appear to be defective after inspection. This warranty does not obligate the Company to bear cost of labor in replacement of parts. It is the policy of the Company to make improvements without incurring obligations to add them to any unit already sold. No warranty is made or authorized to be made, other than herein set forth. This warranty is in effect for one year after purchase.

| DEALER: |
|---------|
|---------|

Yetter Manufacturing warrants its own products only and cannot be responsible for damages to equipment on which mounted.

#### **SAFETY**

A brief description of signal words that may be used in this manual:

**CAUTION:** Used as a general reminder of good safety practices or to direct attention to unsafe practices.

**WARNING:** Denotes a specific potential hazard.

**DANGER:** Denotes the most serious specific potential hazard.

#### **SAFETY PRECAUTIONS**

You can make your farm a safer place to live and work if you observe the safety precautions given. Study these precautions carefully and insist that those working with you and for you follow them.

Finally, remember this: an accident is usually caused by someone's carelessness, neglect or oversight.

#### **WARNING**

Never clean, lubricate or adjust a machine that is in motion. Always lower or block the implement before performing service.

If the machine must be serviced in the raised position, jack or block it up to prevent it from accidentally falling and injuring someone.

Do not allow riders on the tractor or implement.

Use speeds and caution dictated by the terrain being traversed. Do not operate on any slope steep enough to cause tipping or loss of control.

Be sure all personnel are clear of the immediate area before operating.

Read and understand the operator's manual and require all other persons who will operate the equipment to do the same.

Be familiar with all tractor and implement controls and be prepared to stop engine and implements quickly in an emergency.

#### CAUTION

Consult your implement and tractor operator's manual for correct and safe operating practices.

Beware of towed implement width and allow safe clearance.

FAILURE TO HEED MAY RESULT IN PERSONAL INJURY OR DEATH.

#### **BOLT TORQUE**

#### Mounting bolts and hardware

Before operating the Residue Manager for the first time, check to be sure that all hardware is tight. Check all hardware again after approximately 50 hours of operation and at the beginning of each planting season.

All hardware used on the Residue Manager is Grade 5 unless otherwise noted. Grade 5 cap screws are marked with three radial lines on the head. If hardware must be replaced, be sure to replace it with hardware of equal size, strength and thread type. Refer to the torque values chart when tightening hardware.

**Important:** Over tightening hardware can cause as much damage as when under tightening. Tightening hardware beyond the recommended range can reduce its shock load capacity.

The chart below is a guide for proper torque. Use it unless a specified torque is called out elsewhere in the manual.

Torque is the force you apply to the wrench handle or the cheater bar, times the length of the handle or bar.

Use a torque wrench whenever possible.

The following table shows torque in ft. lbs. for coarse thread hardware.

| BOLT DIA.<br>AND<br>THREADS PER<br>INCH | GRADE 2 | OR (A-325) GRADE 5 A-325 | GRADE 8 |
|---|---------|--------------------------|---------|
| 1/4                                     | 6       | 10                       | 14      |
| 5/16                                    | 12      | 20                       | 30      |
| 3/8 -16                                 | 25      | 35                       | 50      |
| 7/16 - 14                               | 35      | 55                       | 80      |
| 1/2 - 13                                | 55      | 85                       | 125     |
| 9/16 - 12                               | 75      | 125                      | 175     |
| 5/8 - 11                                | 105     | 170                      | 235     |
| 3/4 - 10                                | 185     | 305                      | 425     |
| 7/8 – 9                                 | 170     | 445                      | 690     |
| 1-8                                     | 260     | 670                      | 1030    |
| 1 1/8 - 7                               | 365     | 900                      | 1460    |
| 1 1/4 - 7                               | 515     | 1275                     | 2060    |
| 1 3/8 -6                                | 675     | 1675                     | 2700    |
| 1 1/2 - 6                               | 900     | 2150                     | 3500    |
| 1 3/4 - 5                               | 1410    | 3500                     | 5600    |

Lubricate all bearings and moving parts as assembled and make certain that they work freely.

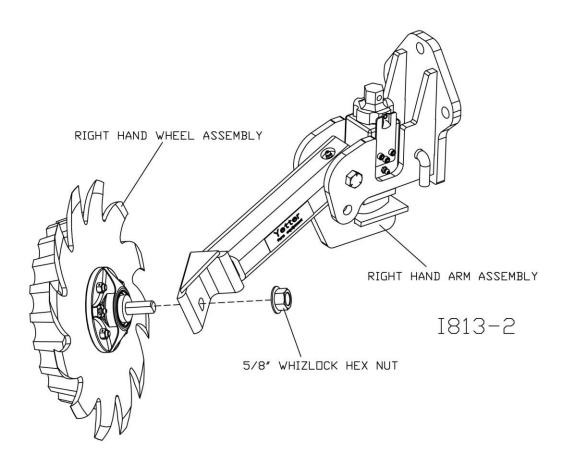

**WARNING:** Never work around the toolbar/implement while in a raised position without using safety lockups.

**CAUTION:** The Residue manager attachments are very heavy. Pay extra attention to lifting techniques while handling and or maneuvering the opener during assembly. Failure to do so may lead to personal injury.

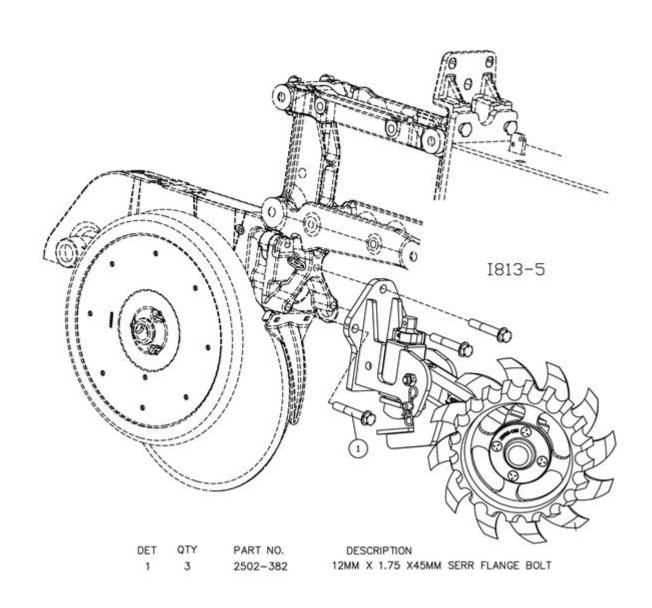

### **ASSEMBLY INSTRUCTIONS**

Step 1. Attach the Residue Manager Wheel Assembly to Arm Assembly, torque 180 ft. lbs.

#### **ASSEMBLY INSTRUCTIONS**

Step 2. Attach the Residue Manager to the planter row unit using; 3) 12 mm x 45 mm bolts, torque 97 ft/lbs.

#### **OPERATING INSTRUCTIONS**

#### DEPTH

Raise or lower the stem and wheel assembly so the teeth of the wheels are in solid contact with the residue and lightly touching the soil.

The function of the row cleaner is to sweep aside residue and not move soil. When using preplant incorporated herbicide, the row cleaner depth should be adjusted to minimize soil disturbance so the cleaner will not reduce the effectiveness of the incorporated herbicide.

#### ROW CLEANER DO'S AND DON'TS

- 1. **DO NOT** move soil, Residue Managers are designed to move crop residue only.
- 2. **DO NOT** operate planter at slow speeds, ground speed affects how aggressive the spoke wheels are; operate at sufficient speed to maintain good residue flow.
- 3. **DO NOT** expect 100% of crop residue to be cleared, it is not necessary and would necessitate engaging the soil. The width of path cleared depends on ground conditions, depth setting and ground speed.
- 4. **DO** expect to see wheels occasionally quit turning, indicates ideal (shallow) setting which is not moving dirt.

#### MAINTENANCE

#### Lubrication

CAUTION: To help prevent serious injury or death to you or others caused by unexpected movement, service machine on a level surface. Lower machine to ground or sufficiently lock or block raised machine before servicing. If machine is connected to tractor, engage parking brake and place transmission in "PARK", shut off engine and remove key. If machine is detached from tractor, block wheels and use shop stands to prevent movement.

CAUTION: Do not clean, lubricate, or adjust machine while in motion.

Use grease based on NLGI consistency numbers and the expected air temperature range during the service interval.

Use a multi-purpose polyurea, water resistant, moderate speed, and NLGI grade #2 grease.

Other greases may be used if they meet the following **NLGI Performance** 

Classification: GC-LB

#### **IMPORTANT:**

Some types of grease thickener are not compatible with others. Consult your grease supplier before mixing different types of grease.

#### **Alternative Lubricants**

Conditions in certain geographical areas may require special lubricants and lubrication practices which do not appear in the operator's manual. If there are any questions, consult Yetter Manufacturing Co. to obtain latest information and recommendation.

#### **Storing Lubricants**

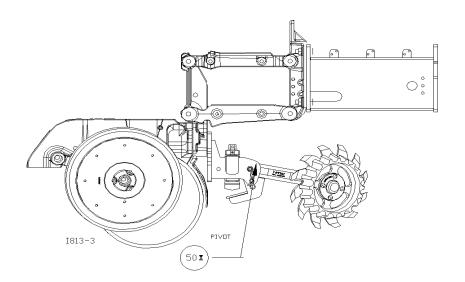

Your machine can operate at top efficiency only if clean lubricants are used. Use clean containers to handle all lubricants.

Store them in an area protected from dust, moisture and other contaminants.

# MAINTENANCE Lubrication Symbols

Lubricate with grease at hourly interval indicated on symbol.

Lubrication Intervals

# IMPORTANT: The recommended service intervals are based on normal conditions; severe or unusual conditions may require more frequent lubrication.

Perform each lubrication and service procedure at the beginning and end of each season. Clean grease fittings before using grease gun, to avoid injecting dirt and grit into the bearing. Replace any lost or broken fittings immediately. If a fitting fails to take grease, remove and clean thoroughly, replace fitting if necessary. Also check for failure of adjoining parts.

#### **Storing the Equipment**

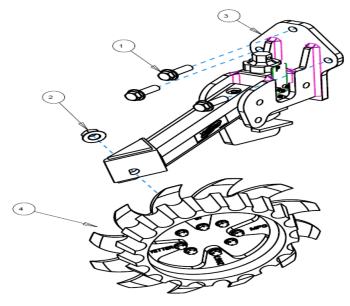

Store the machine in an area away from human activity Store machine in RAISED position.

Install service locks on all wheel cylinders.

At the end of the season, the machine should be thoroughly inspected and prepared for storage. Repair or replace any worn or damaged components to prevent down time at the start of the next season. Store machine under cover with all parts in operating condition.

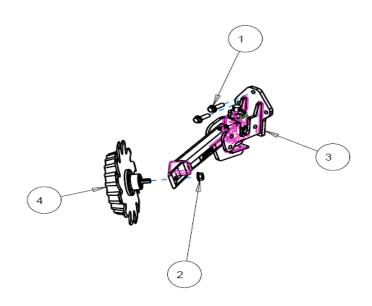

- Clean machine thoroughly to remove all dirt, debris and crop residue, which would hold moisture and cause rusting.
- Inspect machine for worn or broken parts. See your Yetter Farm Equipment dealer during the off-season so that parts or service can be acquired when machine is not needed in the field.
- Lubricate bearings as outlined in the Lubrication section
- Paint all parts which are chipped or worn and require repainting.
- Store machine in a clean, dry place with the planting unit out of the sun.
- If the machine cannot be stored inside, cover with a waterproof tarpaulin and tie securely in place.
- Do not allow children to play on or around the machine
